

## Accessing the GIS server through AutoCAD Map:

To connect to the GIS server through AutoCAD Map use the [white paper from Autodesk](#) as a reference. AutoCAD 2009 or 2010 should not have a problem connecting. If you are using an older version of AutoCAD please upgrade to the current version or contact Autodesk.

Page 5 of the white paper references connecting to data through the Task Pane. You will need to enter the following information.

Click the “Add ArcSDE Connection”

Connection name: Use the default or assign a name

Server name: sde.gis.vt.edu

Instance name: 5151

Click the “Login” button and enter your user name and password.

Data Store: Default Datastore

Version: SDE.DEFAULT

Click the “Connect” button.

Below is a screen capture showing what should be entered for a VT facilities connection.
